COOKTOP WITH SPECIAL MOUNTING ON LPG CYLINDER

LERC has designed and developed a High Efficiency and Highly Reliable Cooktop with direct mounting on LPG Cylinder with Domestic Pressure Regulator and SURAKSHA LPG Hose as per the requirements of the Oil Marketing Companies. In addition it is also fully compliant to IS 4246:2002 (Domestic Gas Stoves for use with Liquefied Petroleum Gases). The product is intended to be used for portable cooking . The target users for this

product are BPL families, single room accommodations , etc. The product has been designed with the required safety features, robustness and aesthetic look. A Thermal Efficiency of around 68% has been achieved. Improved design with special locking arrangement for additional stability. Cooktop can be easily detached from the LPG Cylinder by removing the DPR from the SC Valve fitted onto the cylinder. Use of IS certified LPG Stove components for safety.
