

# MAKING HOMES SAFER

## FKM BASED TIGHT JOINT FOR DOMESTIC PRESSURE REGULATOR

The Tight Joint in the DPR provides secondary seal between SC Valve and DPR to withhold gas leak in case of leak from the O-Ring inside SC Valve of the LPG Cylinder.

LERC has developed a highly reliable FKM based new design Tight Joint with modified form factor and superior FKM material, to enhance the component performance thereby reducing leakages and increasing the Domestic Customer Safety to unparalleled levels.

## FEATURES

**PRESSURE  
WITHSTANDING  
CAPACITY UP TO  
15 BAR**

**INCREASED  
SEALING SURFACE  
FOR BETTER  
SEALING**

## BENEFITS

**INCREASED  
CUSTOMER SAFETY**

**INCREASED SERVICE  
LIFE**

**REDUCED DPR LEAKS**

**IMPROVED SEALING  
PERFORMANCE**

**PATENT PENDING**
